LEXMARK™

Education Challenge:

In today's education environment, administrators and educators need to find better ways to assess student performance using the most efficient methods available.
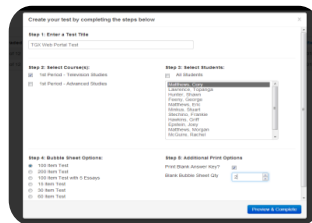

Testing and Grading Portal:

Now the process of creating tests, submitting tests for printing, and viewing your student results is simple and easy. With the Lexmark Testing and Grading Web Portal solution, all of these actions can be performed by an educator from their classroom or home* using their PC or mobile device*.

With this user-friendly tool, educators can spend more time focusing on their students and less time at an MFP device. Because some of the Testing and Grading functions are now available away from the MFP, educators no longer have to come in early, stay late, or use their lunch break to avoid long-lines at an MFP.
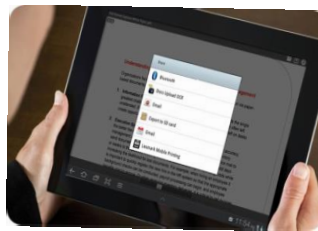

Benefits:

- **Expanded functionality provides educators a more flexible solution**
- **Electronic grading eliminates need to print an answer key**
- **Single-point access to test reports**
- **Increases educator productivity**

Features

Create Tests From Your Desk
The Lexmark Testing and Grading Web Portal now enables educators to create tests from their classroom workstation through an easy to access portal.

Create Tests Using A Mobile Device*
The Lexmark Testing and Grading Web Portal is accessible with any mobile device that can connect to the internet .
*Must have access to school network

Consolidated Access to Reports
The Lexmark Testing and Grading Web Portal provides access to test results in a centralized location, so that individual files no longer need to be saved in network folders.

Print Release Integration
The Lexmark Testing and Grading Web Portal integrates with the Lexmark Print Release solution so that created tests can be retrieved from ANY Lexmark device.
